> Grow your business in 5 easy steps

1. Get a GreekMarket.co.uk Seller account

Register for a GM Seller Account, where you can easily create and manage your Greek products on our platform.
Enter your business details, describe your business, upload your logo and you are ready to start!

2. Create your products

Once your account is approved, in order to start selling a product on Greek Market you need to enter all necessary product details such as barcode information, description, weight and upload product photographs. Oh, and don't forget to set your prices!

3. Manage your inventory

Just before your product goes live on Greek Market you have to count how many products will be available and start managing your inventory. This will also determine your next step.

4. Start selling or use GMF

Once your product is available for customers to purchase, you can start selling and dispatching your products directly to them. Your prices should reflect your costs such as packaging and postage. Alternatively you can use Greek Market Fulfilment (GMF) which can make your life easier.

4.1. Send your products to Greek Market (GMF)

Simply package your products and send them to your nearest Greek Market warehouse in the UK or Greece. Greek Market will store your products safely. When an order comes in GM will pick your product from the shelf, pack it in appropriate packaging and dispatch it to your customer via professional couriers.

5. Manage your sales

Manage and track your product sales using online reports and tools from within your GreekMarket.co.uk account.
